Office Memorandum • UNITED STATES GOVERNMENT~~CONFIDENTIAL~~

TO : Acting Executive

DATE:

FROM : Management Officer

SUBJECT: Proposed Plan of Reorganization of the Intelligence Production Offices of CIA and Realignment of Certain Agency Functions.

1. The following proposed plan of reorganization of the intelligence production offices of CIA together with the establishment of a Plans and Operations Staff is submitted for your consideration.

2. The question of function vs. area organization is one that has been given a vast amount of consideration, but to date remains unsettled as far as this Staff can ascertain. It would be presumptuous for us to assume that a final answer has been reached despite numerous conversations with officials of the offices affected.

3. The proposed plan, therefore, is based upon several assumptions and concepts:

a. Assumptions

(1) The all area organization now used in ORE has not proven satisfactory and probably cannot be made to work without considerable modification.

(2) The all functional organization tried by the War Department G-2 during World War II was determined so unsatisfactory that its consideration by CIA seems totally undesirable. The present CIA organization on an area basis was no doubt prompted by the G-2 failure.

(3) CIA must be assured that the production of National Intelligence is adequate, timely, effective, and correct, and our organization must be designed to guarantee the best possible product by the best and most efficient method.

b. Concepts

(1) There must be a central point at which the intelligence productivity of all components of CIA are gathered and processed into National Intelligence.

(2) There must be only one intelligence production office in CIA and to achieve this ORE and OSI should be re-consolidated.

CONFIDENTIAL

4. The basic principle of the Management Staff recommendation stems from a considered opinion that the overwhelming quantity of information, that is the prerequisite to intelligence production, emanates as reports of geographical area. Little intelligence is produced without regard to area and, therefore, it is considered essential that the lowest level of organization should be on a geographic basis.

5. *statements of* The Recommended functions *for proposed* of the newly constituted organizational components are attached. The proposed Office of Intelligence Production organization chart should reflect ~~in final form~~ the following breakdowns:

Soviet World Division	- Function, Area, Area
Scientific Division	- Function, Function, Area
Non-Soviet World Division	- Area, Function, Area

6. Attached statements of functions for ~~certain~~ existing organizational components have been revised to reflect changes in responsibility as follows:

- a. Coordination of Agency requirements and issuance of collection directives transferred from OCD to OIP.
- b. *Security functions + Physical control of* Liaison responsibilities and activities with other government agencies transferred from OCD to I&S Staff. *ILLEGIB*
- c. Responsibility for intelligence presentations, interrogations, and briefings of governmental personnel transferred from ORE to OO. *Not important?*

7. The organization~~x~~ and statements of functions of other Agency components remain as stated in Agency Regulation dated 1 July 1950. 25X1

8. *Planning is also progressing toward the consolidation of OSO and OPC into a single office of special operations under a single Assistant Director when NSC approval for such consolidation can be obtained.* 25X1
